

NOTIFICATION

December 11, 2012

After careful consideration the Tennessee Department of Labor and Workforce Development, Workers' Compensation Division has decided to suspend its Medical Data Call project and participate in the **NCCI** Medical Data Project.

The current medical data call project in Tennessee is hereby suspended effective immediately.

The NCCI Medical Data Project is now the official method of collecting medical data for Tennessee. Statistics on Workers' Compensation Medical Fee Schedule will now be obtained from NCCI.

Thank you for the time and attention you have given this project. The division feels that moving to the NCCI Medical Data Call project will allow a uniform comparison of medical data in Tennessee with other states. If you have questions on Tennessee's medical data project, please contact Bonnie Hudgens at bonnie.hudgens@tn.gov
